SUMMARY

Artificial Intelligence and Data Science undergraduate with hands-on experience in machine learning, full-stack development, and real-time data applications. Skilled in building AI-driven systems, predictive models, and scalable web applications using Python and MERN stack technologies. Passionate about solving real-world problems using data science, deep learning, and intelligent systems.

EDUCATION

B.Tech – Artificial Intelligence and Data Science, Mepco Schlenk Engineering College, Sivakasi
CGPA: 7.9 / 10 (till 5th semester)

Higher Secondary Certificate (HSC), Vinayakar Matriculation Higher Secondary School, Sivakasi
Score: 86%

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Development: HTML, React.js, Node.js, Express.js, MERN Stack

Databases: MySQL, MongoDB

PROJECTS

Stock Price Prediction System

Developed a machine learning application to predict stock price trends using historical financial data. Integrated Yahoo Finance API to fetch real-time market data. Built an interactive React.js dashboard for visualizing trends and generating buy/sell insights.

Tech Stack: Python, React.js, Yahoo Finance API

ATM Anomaly Detection using CLIP Autoencoder

Designed an AI-based anomaly detection system for ATM surveillance videos using a CLIP-based autoencoder model. Implemented real-time anomaly detection using PyTorch and Transformer-based architectures. Enhanced security monitoring by detecting abnormal activities in financial surveillance systems.

Tech Stack: Python, PyTorch, CLIP, NumPy

Fuel & Fix – Online Fuel Delivery and Mechanical Assistance Platform

Built a web platform for on-demand fuel delivery and emergency mechanical assistance services. Implemented route optimization using mapping APIs and location tracking. Integrated a chatbot support system to assist users during emergencies.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Leaflet API

Disaster Intelligence Platform

Developed an AI-powered disaster early warning system for floods, cyclones, and landslides. Integrated real-time weather data and news alerts for dynamic risk monitoring. Applied deep learning models and geospatial data analysis to improve disaster preparedness.

Tech Stack: Python, TensorFlow/PyTorch, React.js, MySQL

ACHIEVEMENTS

Domain Winner – Resilience Category | AITHON 2026 (National Level)

Developed an AI-driven Disaster Intelligence Platform leveraging deep learning and geospatial data to improve disaster preparedness.

Sprintathon 2025 – St. Joseph's College of Engineering

Selected among Top 100 teams out of 2000+ participants and competed in the final 24-hour hackathon round.

Texas'25 Hackathon – SRM Institute of Science and Technology

Participated in a national-level hackathon focused on innovative technology solutions.

Smart India Hackathon (SIH) 2025

Selected through the internal college hackathon round.
